

Brooksville Computer Network Solutions Support Plan:

REMEMBER BVCNS WHEN YOU NEED SUPPORT!

Hernando, Citrus, Pasco, Sumter & Hillsborough! Costs of IT Solutions Have Gone Down!

Brooksville Computer Network Solutions (BVCNS) now offers you a \$2,000 *annual* plan (or \$200 monthly – three months minimum) to take care of your office network! Up to TEN computers on your office network or your office AND home computers.

Just \$2000 for an annual contract – it's the sweetest deal in Hernando networking - bar none!

No confusing "Platinum", "Gold", "Silver" or "Bronze" plan packages with all sorts of extra costs for added monthly service. BVCNS has years of experience working with between 3,000 and 5,000 corporate computers and servers all networked together.

As the years have gone by greater and greater savings to corporate clients have been realized through downsizing IT (Information Technology) and MIS (Management Information Systems) corporations through centralized management and monitoring using secure 256 bit

encrypted connectivity no matter how far apart those offices may be physically from one another. Your office optimization occurs after hours, resulting in less down-time for workers at their desks and improved PC performance when they return. Of course your plan *also* includes any other on-site service as well as standard & preventative maintenance as needed.

BVCNS \$2,000 annual network contract offer uses this same centralized management and monitoring technology to efficiently and quickly manage many office needs. For your security your office account is set up separately - isolated from all other BVCNS accounts - so your office security is guaranteed, and it's yours. You maintain the power and control to lock out any management and monitoring of your entire network at any time for any reason.

BVCNS - With repeat annual network contracts in place since 2004!

Supported Technology Areas

Windows 2000/XP/Vista

System administration

Software distribution

Asset management

Critical application support (database, accounting systems, membership systems, etc.)

Existing and newly created web site support

Internet access support

New user setup and support

Software licensing and assurance

Training

SERVICE BLOCKS OF 10, 20 OR 30 HOURS ARE ALSO AVAILABLE

Is a fulltime contract not right for your business? BVCNS also offers blocks of 10, 20 and 30 hours of time usable at any time within a 365 day period at substantial savings. Standard network engineering/maintenance fees in central Florida typically range between \$85 and \$100 per hour. This is primarily due to network engineering "calculations" dealing with, and troubleshooting areas of TCP/IP, Microsoft (and other) programming errors/incompatibilities etc., and researching novel solutions to new problems due to constantly occurring new problems. By purchasing 10, 20, or 30 hour blocks of time, your company will save between 17% and 40% - all costing below \$2,000 - and allowing you to "sample" BVCNS' quality of service and at the same time permitting you to determine just how many hours on average you may need in order to estimate next years cost projections and level of service - and save even more.

Call BVCNS for a consultation, interview or a quote on an annual contract or blocks of 10, 20 or 30 hours today! Call (352) 232-1678
